

Profile of the Month – Hannah Johnson

Hannah Johnson is our newest hazardous waste consultant. After two short years with Marion, she has already become a critical member of the consulting department and the waste management team.

Hannah joined Marion with a Master's degree in Environmental Geology. Her written reports glide through peer reviews and her mastery of hazardous waste management attests to her quick learning abilities and her shrewd attention to detail. Proper hazardous waste management is a scholarly pursuit, and through the guidance of Lex Lechleiter and Everett Pierce, our staff experts, she has rapidly grown in her role.

Whether managing hazardous waste inventory for a client or writing detailed environmental reports, Hannah gives every task her full attention. She joined MEI with impressive credentials and high expectations, and we are thrilled to say she has surpassed them all.

Marion Environmental Inc. is one of the leading providers of environmental consulting, remediation, and emergency response in the southeast. Our goal is to provide cost effective solutions to environmental problems. Making *our* standard, industry standard.

Environmental Health & Safety Summit Chattanooga Convention Center

Sam Taylor and Paul Van Alstyne are presenting at the Environmental Health & Safety Summit. Their talk will be about job safety audits and is titled “The Proactive Approach to Incident Reduction.”

Marion has a booth at the Environmental Summit as well.

Mike James and Barry Lasley at the MEI booth in Urbana, IL

Marion participated in the Railroad Conference in Illinois and hosted a booth at the event. David Patton of Norfolk Southern delved into a derailment response and the successful cleanup efforts led by MEI. This conference always highlights pertinent topics and is a favorite of our ER team.

MANUFACTURING SAFETY TIPS

1. Inform supervisors of unsafe conditions
2. Use equipment properly
3. Wear safety equipment (PPE)
4. Prevent slips and trips – clean spills immediately
5. Keep work areas and emergency exits clear
6. Eliminate fire hazards
7. Avoid tracking hazardous materials
8. Prevent objects from falling – stack boxes straight up and down, use nets and toe boards when appropriate
9. Use correct posture when lifting
10. Take breaks
