

Marion Environmental, Inc. – MEI Monthly

JUNE 2014

VOLUME # 3 ISSUE #6

Our Nashville team is quickly taking shape, with some key positions already filled by industry veterans. More staff, more equipment, and more capabilities will be added in the future, but so far the team is off to a great start.

Meet the Nashville team:

Mark Lucas is our office manager. He has 10 years experience as an environmental specialist.

Tim McGahey has 25 years experience in the environmental industry and is an experienced supervisor.

Joe Lallo is a retired fire chief who is an experienced incident commander and will lead the emergency response department.

Michael Emery is a hazardous waste specialist with many years in the field and specializes in asbestos and lab packs.

Marion Environmental Inc. is one of the leading providers of environmental consulting, remediation, and emergency response in the southeast. Our goal is to provide cost effective solutions to environmental problems. Making *our* standard, industry standard.

MEI OPENS SATELLITE OFFICE IN NASHVILLE

Mark Lucas, Tim McGahey, Joe Lallo

MEI, a leading provider of environmental remediation services and emergency response for Tennessee and North Georgia, is pleased to announce the opening of our Nashville office. The new office will hit the ground running, offering many of the same services already offered by our other branches, with many more capabilities to be added in the weeks and months to come.

The office is outfitted with equipment for Emergency Response, industrial services, and hi-rails for the railroad. With a full staff of industry veterans, the new MEI – Nashville office is poised for success.

To contact the new office, call us anytime: (888) 888-8149. We plan to hold an open house in the coming weeks. If you're in the area, please stop by!

Congratulations Steve Wild

Steve Wild, a long time Hydrogeologist with Marion Environmental, has just added Environmental Engineer to his credentials.

Through the years, Mr. Wild's expertise has included responding to spills that impact waterways, managing superfund sites, writing reports to state regulators, and calculating the environmental impact from releases.

Mr. Wild specializes in industrial environmental controls and cleanups. He will assume MEI's Senior Engineering position and assist local industries with environmental regulations and help them reduce environmental impacts from industrial processes and property development.

His professional experience will facilitate his ability to design effective remediation systems and to predict the feasibility of clean up methodologies.

Happenings:

DOT Hazard Material Training
Several employees from MEI are renewing the DOT Hazards Materials Training Certification on June 19th in Chattanooga.

In late June, MEI is sending representatives to an ethanol safety seminar given by Ethanol IRFA in Nashville and Knoxville. Ethanol is transported by rail and all ER responders should be trained to respond to the unique hazards associated with ethanol incidents.

Safety Tip:

Lightning storms can be a common occurrence this time of year, so it's wise to maintain proper safety habits in the event of a storm. If outdoors, avoid high ground, water, and open spaces. Metal objects, including fences, wires, and machinery, should also be avoided. If indoors, stay away from water, doors, and windows. Appliances such as computers and power tools should be unplugged in case of a power surge. If someone is injured, CPR should be administered by a qualified person while help is on the way.
